If a test is administered, the provider must describe the results of that test in the report, including available numerical test scores (e.g., standard scores, T- scores). Describe discrepant findings when indicated. Describe the client's cognitive, behavioral, and emotional functioning. Provide an integrated interpretation of all the available data including interview(s), collateral data, observations, and test results. Any limitations to the selected tools and measures and their interpretation should be documented and discussed in the report. The impact of self-presentation and response style on the validity of the assessment should be assessed and discussed.

Diagnoses: Provide diagnostic impressions according to the Diagnostic and Statistical Manual of Mental Disorders-5-TR (DSM-5-TR). Corresponding diagnostic codes from the ICD-10 (International Classification of Diseases) are required. The principal diagnosis should be listed first, with additional diagnoses listed thereafter, in order of significance. V codes are appropriate if they are the focus of clinical attention. Justification for all diagnostic impressions should be provided (e.g., criteria from the DSM-5-TR). Simply listing diagnostic rule-outs is not helpful, as the client was referred for a psychological evaluation specifically to rule-out competing diagnoses.

Summary and Conclusions: Summarize evaluation findings and explain the basis of your risk assessment, following ethical and professional guidelines for communicating risk predictions. List each referral question and provide an appropriate response to each of the questions that were to be addressed in the evaluation, including discussion of the basis for your clinical conclusions along with any relevant limitations. If a referral question could not be answered, please indicate and explain the reason(s). This could be a qualified response to the question and/or a description of what information would be needed to answer the referral question(s) adequately.

Recommendations: Provide relevant recommendations to address diagnoses, amelioration of risk factors, placement concerns, victim/community safety, recidivism, and evaluation findings.
